

Bringing Aromatherapy into Healthcare

Consulting and Training for Patches

We can consult with you for program development and decision making as well provide staff education that can be delivered to your staff in a variety of ways to meet your needs.

Why Aromatherapy Patches ?

Patches are a **SIMPLE** and **PRACTICAL** method to deliver essential oils. No cotton balls, over portioning , spills or over whelming aroma for others. Patches are the preferred method of use in busy hospitals and clinics to deliver essential oil therapies.

Benefits of the Aromatherapy Patch

- Provides a non-pharmaceutical intervention that is cost effective
- A proven way to improve patient satisfaction
- Prefilled single use - lasts up to 8-10 hours
- Inhalation only, no dermal absorption of oils onto skin
- Proven research in nursing to reduce stress, anxiety, nausea and pain by 30-50% (ask for research!)
- Patented technology maintains the pure therapeutic quality of the essential oils

"Jodi played an instrumental part in getting aromatherapy started at our hospital. Her expertise in aromatherapy and passion for the field were evident – she helped us create our education for aromatherapy use in a hospital setting. Our patients and staff love it!"

*Renee @ Regions Hospital,
St. Paul, MN*

PILOT STUDY RESULTS

Regions Hospital in St. Paul MN Surgical Unit pilot study on the use of Aromatherapy Patches recorded 367 survey responses

- 86% found the Aromatherapy Patch to be helpful for the intended purpose
- 87% said that having an Aromatherapy Patch enhanced the surgical experience
- 94% said that Aromatherapy Patches should continue to be offered to patients

Jodi Baglien, I blend my years of experience as a Certified Clinical Aromatherapist, Educator and Integrative Therapist, to deliver evidence-based, compliant and sustainable aromatherapy programs into health care settings.
